Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: On page 5, last line, "verticalvertical" should be replaced with "vertical".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 4, "the bottommost holder" lacks proper antecedent basis.

In claim 6, it is not clear what is meant by "...through a top portion...receiving part."

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Dirxx (3,498,471).

Dirkx discloses a document holder comprising a plurality of holder bodies (1-4) having an adapting part (8) and the holder bodies being mounted to one another in a vertical direction (as seen in figure 8); a shaft assembly (5) arranged in the adapting part of the bottommost holder body (as seen in figure 1), the shaft assembly having a first pivot part formed on a top (as seen in figure 1); and a plurality of pivot modules connecting the holder bodies (6), the pivot module having a second pivot part at a top and a matching part at a bottom (as seen in figure 8).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 6, as best understood, is rejected under 35 U.S.C. 103(a) as being unpatentable over Dirkx in view of Yang (6,648,390).

Dirkx discloses the claimed invention except for the shaft assembly having a receiving part formed at a bottom thereof.

Yang discloses single-stack tool rack comprising a plurality of holder bodies (20) and a shaft assembly (13) having a receiving part (60) formed at a bottom thereof (as seen in figure 1). Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention to modify Dirkx's invention to include a receiving part

formed at a bottom of the holder bodies, as taught by Yang, to provide a secure base structure for the device.

Allowable Subject Matter

8. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references disclose document holders and trays.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monica S. Carter whose telephone number is (703) 305-0305. The examiner can normally be reached on Monday-Thursday (6:30 AM - 4:00 PM).
